

SOFTech Integrations LLC

CAPABILITY STATEMENT | OCTOBER 2026

Applied AI. Connected data. Practical decision support.

SOFTech Integrations LLC is a founder-led technology company focused on applied AI integration, software and data engineering, and decision-support research and development.

CAPABILITIES OFFERED

Applied AI integration

LLM integration, agent workflows and task automation designed around human review.

Software & data engineering

Python and TypeScript development, API integration, data ingestion and transformation, and cloud-based internal tools.

Research & prototyping

Requirements analysis, feasibility studies and iterative prototypes for analyst and decision-support workflows.

MATRIX / INTERNAL R&D

Matrix is an early, privately funded internal prototype with no government award. Broader decision-support capabilities remain proposed research and development.

Founder background

Justin Nichols brings military and technology experience. This is his individual background; SOFTech does not yet have customer past performance.
